DIRECTORY OF REFRIGERATED WAREHOUSES
IN THE UNITED STATES 1/

The United States Department of Agriculture has collected statistical data relating to the refrigerated warehousing industry since 1914. These data are published monthly in the Cold Storage Report which lists the quantities of various food commodities stored in refrigerated facilities at the close of each month and the amount of storage space used for storing these products. In addition, a survey of refrigerated warehouse capacity is made biennially to determine the amount of gross and net space, by temperature range, in public, private, and semiprivate facilities. It is only through the voluntary cooperation of the warehousemen whose facilities are listed in this directory that reasonably accurate storage information can be collected for the Cold Storage Reports and the surveys of refrigerated warehouse capacity.

This is the sixth directory of this kind released by the Department. The first was compiled and released in 1947 and revised in 1951, 1953, 1959, and 1962. Names and addresses shown in this directory were compiled from those participating in the October 1, 1965 biennial survey of the capacity of refrigerated warehouses in the United States. Alaska and Hawaii are included for the first time.

This revised directory has a threefold purpose:

1. To extend recognition to warehousemen who, year after year, have contributed their time and money toward making possible the monthly Cold Storage Reports and related reports on the refrigerated warehousing industry.
2. To make readily available to processors and food handlers information on the availability of storage facilities in localities where space is needed for their products.
3. To furnish research and statistical users of the Cold Storage Report with a better idea as to the extent of present coverage for the monthly reports.

We urge those who use this directory to call to the attention of the Department of Agriculture any refrigerated storage facility, as defined below, which is not listed herein.

Refrigerated Storage Facilities Listed

Refrigerated storage warehouses listed in this directory are facilities artificially cooled to 50° F. or lower wherein foodstuffs are generally stored

1/ Revised by Agricultural Estimates Division, Statistical Reporting Service

for 30 days or more. This includes all types of storage businesses having refrigerated storage space--public, private, semiprivate, and meatpacking establishments. Food packers and processors are also included, provided: (1) they have refrigerated storage space for holding their products, and (2) their products are generally held for as long as 30 days in this space.

Food handlers who conduct a business from space leased in public or semi-private facilities and have complete control over the in-and-out movement of their commodities are included in this directory if they are using their storage space as defined above.

Not included in the directory are facilities owned by wholesalers, jobbers, or retailers who use their storage space for holding products less than 30 days. Nor are facilities listed that belong to the Armed Services or are a part of a hotel or similar establishment where persons are housed and fed.

The Department's cold storage reporting program does not include frozen food locker plants and, therefore, such establishments are not listed in this directory. Branch distributing houses of meatpackers and meatpacking facilities where refrigerated space is used solely for carcass chilling, cutting, boning, etc., and not for storage purposes are not included.

How the Warehouse List was Determined

Warehouse facilities listed in the directory are those from which monthly reports are being received regularly in support of the Department's market information program on cold storage holdings, or those that participated in the October 1, 1965 biennial survey of refrigerated warehouse capacity.

Arrangement of the Directory

To present the data in the most usable form, States are arranged alphabetically, as are cities within States, and warehouses within cities.

The address of each warehouse is usually the plant location and not the mailing address of the firm. In most cases, however, both addresses are the same.

Warehouse companies or associations having more than one facility are listed in each of the cities where the units are located, or at the branch plant address if it is different from the "parent" warehouse location. Although every effort has been made to list each unit or branch separately, it may be that some "parent" warehouse has not notified the Department of Agriculture of its units and so they are not listed.

Symbols and Definitions Used in this Directory

- PB - Public cold storage: An artificially cooled warehouse operated to store food for others for pay.
- PR - Private cold storage: An artificially cooled warehouse operated by a producer, processor, or distributor for his own use exclusively and not for the storing of commodities for others for pay.
- SP - Semiprivate cold storage: An artificially cooled warehouse in which the operator stores his own commodities, as well as various food commodities for others for pay.
- MP - Meatpacking plant: An establishment engaged in processing meat and meat products for food and having refrigerated storage space for these products.
- PBA - Public apple house
- PBF - Public fish house
- PRA - Private apple house
- PRF - Private fish house
- SPA - Semiprivate apple house
- SPF - Semiprivate fish house
